PROFILE

Developer with a passion for learning and creating new things. Eager to join a dynamic team where I can contribute with my skills. Alongside programming, my interests include web 3 and fitness. Whether I am working on a personal project or collaborating, I strive to deliver my best and push boundaries.

PROJECTS

Vigym

A full stack fitness app with full CRUD, using openAI API and exerciseDB
Tech used: javascript, typescript, react, nodeJS, express, mongoDB, CSS, Tailwind

Pragto

A full stack gamified to-do app where users are rewarded for completing tasks

Tech used: javascript, react, nodeJS, express, mongoDB, CSS

Buccaneer Barrage

A pirate cannon shooter
Tech used: javascript, HTML, CSS, canvas

EXPERIENCE

Jun 2023 — Aug 2023

Full Stack Developer Intern, Kalygo

- Revitalized platform analytics by designing and implementing an insightful admin dashboard, enabling real-time tracking of usage statistics.
- Drove user growth by implementing a versatile sign-in approach using Google, which not only diversified the platform's user base but also amplified user engagement across the board.

Nov 2022 — Jan 2023

Logistics, Tovla JR

- Streamlined warehouse operations by implementing new management systems, resulting in an increase in overall efficiency.
- Optimized outbound shipments by organizing and packaging products to ensure high quality for customers.
- Upheld inventory management by proper tracking of different products in stock, reducing discrepancies and improving order fulfillment time.
